#### **Preface**

Due to the role that the private sector plays in producing goods and services the community needs, and the efforts of the state of Kuwait to raise the share of contribution of the private sector in gross domeestic product, the Statistical and Census Sector of the Ministry of Planning has carried out a study of the main features of employment of Expatriate Labor Employment in the private sector as the majority of employees in the private sector are Non-kuwities.

The study aims to investigate and analyze the main demographic and socio - economic characteristics of expatriate labor employment in the private sector especially its size and distribution by sex, age group, level of education and marital status. It also seeks to study their occupation, economic activity, level of wages, and distribution of employment by nationalities (country groups).

The data includes all Non-kuwaties employment in the private sector, except employment in the household Sector (domestic servants and related workers) according to labor permits issued by the Ministry of Social Affairs and labour for those who are willing to work in the private sector. Thus the data present the number of employees registered in the ministry and not the actual employment in the private sector. Thus the data present the number of employees registered in the Ministry and not the actual employment in the private sector and encompass all companies owned either completely or partially by the private sector.

The Statistical and Census Sector is pleased to present this tenth study of the main features of expatriate labor employment in the private sector as of 30/6/2004. This follows the previous issues that the Sector has published since 1995 presenting the main features of expatriate labor employment in the private sector as of the 30 June in each year .

The Statistical and Census Sector hopes that the set of data and indicators presented on expatriate labor employment in the private sector meets the needs of all planners , researchers and those who are concerned and interested in the economic affairs of the State of Kuwait.

We would appreciate any comments and suggestions . Please send them to: <a href="mailto:ppp@mop.gov.Kw">ppp@mop.gov.Kw</a> or fax number : 2430464 .

Asstt. Under-Secretary for Statistical and Census Sector Ministry Of Planning
